

Name \_\_\_\_\_

Cut out labels below and glue them on the Venn diagram above:

|   |  |  |
|---|--|--|
| <b>Made of frozen ice, gas and dust</b> | <b>Have a long gas tail</b>                | <b>Also known as planetoids</b>                    |
| <b>Made of rock and/or metal</b>        | <b>Have a long dust tail</b>               | <b>Surrounded by hydrogen cloud</b>                |
| <b>Orbit the Sun</b>                    | <b>Have a long ion tail</b>                | <b>Have no atmosphere</b>                          |
| <b>Ceres is the biggest</b>             | <b>Have no tail</b>                        | <b>Part of our Solar System</b>                    |
| <b>Halley is one</b>                    | <b>Highly elliptical orbit</b>             | <b>Sungrazers are ones that crash into the Sun</b> |
| <b>Some come close to the Earth</b>     | <b>Most orbit between Mars and Jupiter</b> | <b>Some have hit the Earth</b>                     |
